### SCIENTISTS ON A JUNKET

National Geographic Society's Ex cursion to the Blue Ridge.

Exploration of the Historic Region of Bull Run and Manassas Gap. Major Hotehkiss' Lecture.

The members of the National Geographic ciety, accompanied by many of their friends, spent yesterday amid the lavisl charms of the blue Ridge. A special train elegantly appointed, conveyed them from this city at 9 o'clock yesterday morning over the Southern Railway, arriving at Linden, Manassas Gap, at 11:30.

After leaving the bottom lands of the Potemac the train ascended the valley of neron Run, and soon left this to ascend the plateau; thence up and down over the rolling surface of the Piedmont plateau, whose summit has an elevation of 350 feet; thence westward to Thorofar-Gap, in Bull Run Mountain, over red Mesonaic sandstones and shales, and ther through the mountain itself, with all its tragic recollections of the din and clamor

Finally the locomotive, puffing and inting, climbed up the Blue Ridge to inden, where the party disembarked and forthwith proceeded to discuss a sumptions repast in evidence near the depot.

This accomplished, Maj. Jed Hotchkies the famous old "pathfinder," gave an eloquent sketch of the war history of the and Mr. M. R. Campbell, in an interesting address, called attention to the physical geography of the neighbor

At 1 o'clock several of the party as cended Mount Monterey, on the north of the gap, 900 feet above the station, and 1,800 feet above the sea, while others ventured to climb High Knob, on the ath, 2,400 feet above the sea.

From these points extensive and magnificent views were obtained, especially to the wes ward. In this direction lay the Shenandoah Valley, streeting to the north east, as far as the eye could reach, and to the westward across to the North Mountain. Through it, meandering in great curves could be traced Shenandoah River and the orth and som theranches, and between these streams were seen the strange forms of Massauntien Mountain, enclosing a cause shaped valley. To the eastward stretched the broken country to the Bull Run Mountain d beyond that the undulating surface of the Piesmont Plateau.

The train left on the return trip at 4 o'clock, arriving in this city at 7 p m. Among those who engaged in the trip were the following: Mr. and Mrs. Gannett, Mr. Everett Hayden, secretary of the society, Mr. William T. Powell, Mr. Weston Fint, Miss Gertrude E. Wall Street Yesterday. New York, May 22 - The returns of the New York costom house for the week show a further falling off in imports and therefore substantiate the assertion that the extraordinary imports of over \$18,000,000 two weeks ago was the colmination of the movement to anticipate the effects of the tariff measure now the effects of the tariff measure now under discussion in Congress. The decrease in imports as compared with last week is over \$1,000,000, and as compared with the previous week more than \$7,000,000. On the other hand the exports of merchandise are gradually increasing.

merchandise are gradually increasing it must not be interred, however, that this decided change in the foreign mer-chandise movement foreshadows a cessation of shipments of gold. This is the time of year when a large amount of commercial credits are ordinarily settled, and this year they are larger than usual because of the phenomenal imports of merchandise referred to above. Account must also be taken of the fact that a number of European governments, particularly Russia and Austria, are willing to pay what amounts to a small premium on gold to increase their holdings of that metal. This explains the shipment of \$1,200,000 today, and the engagement by a Foston banking house of \$500,000 for shipment

There has been no change this week in the character of the dealings on the Stock Exchange. The proposed investigation of the anthracite coalcompanies under the new anti-trust laws passed by the last legislature, has resulted in lower prices for Jersey Central and one or two others of the coal stocks. The extent of the decline in Jersey Central, however, would seem to indicate that special causes have influenced the sellers of that stock. The remainder of the list is in the main higher than last

Kidder, Pcabody & Co., of Boston, will export to Germany on the steamer Trave, sailing from this port on Tuesday hext, \$500,000 in gold. This will make the total export since the present export move-ment began, \$13,604.474.

The long gapa in the table tell the story of the stock exchange yesterday. There was an inordinate duliness after the first few minutes and an absence of anything bell, Mr and Mrs. H. Farquhur, Mr. and Mrs. L. Kohl, Major and Mrs. C. S. Wilson. people are afraid to guess the market, even those who speculate most rashly, in the face of the uncertainties for this week Prices closed slightly higher than Friday night.

> Some of the factors to be counted in the equation of the next few days are the very uncertain Cuban situation, with its almost numberless possibilities; the tariff discussion, which will be taken up in the Senate; certain Supreme Court decisions which may come out on Monday, and the probabilities of larger gold shipments this It now looks as if Mr. Reed will force

the House to wait for the President to act in the Cuban matter. Possibly he cannot, however. Mr. McKinley's next step is by no means an easy problem to solve. The story that he and the State Department have been flatly repuised by Spain is probably true. The message which he is said now to be preparing may be sent on any day. That he acts with personal integrity cannot perhaps be ques-tioned, but every move in the Cuban game so far seems to prove that the Administration intends that Cuba shall purchase her freedombypaying Spain over \$300,900,000 and the sugar people \$150,000,000. the light of this idea, the repulse of our offer by Spain is a very pretty subterfuge to keep the people of Spain from open revolt

against the government.

The message soon to appear should, to follow out this plan, be bellicose in the extreme. If the President counselled the obtaining of our desires from Spain by force, the Spanish government could then back down with grace before its prople, who, themselves, would not care to go the length of war with us.

the Administration could "demand' that Spain accept the payment of the enormous indemnity by the Cubans and Spain could reluctantly agree to take the \$300,000,000, which she has no

right to. The sudden energy of the Congress will almost surely force the hand of the Adninistration. The moves in the game are The meaning of likely to come rapidly. this to Wall street will be certainly large fluctuations, probably a hot decline when the message comes, probably a fine rally when it is known that there will be no war and that the whole game is simply a commercial transaction mostly with the object of benefiting the sugar people, certainly mistakes by the average specu lators and certainly profits by the sugar

The talk of a probable favorable de cision in the Nebraska maximum rate case was the principal bullish factor during the short session yesterday. The de cision will be looked for eagerly, and will probably have an immediate effect, though it may have been sufficiently dis-counted by people who have guessed it

The bear selling of the coal stocks is said to be based upon the unfavorable con dition of the anthracite coal trade. It is claimed that this is not only a past condition, but that it has been fully discounted Here that the coal business has now turned the corner of adversity, and that improve ment in the earnings of the roads dependent on this industry will surely come

An independent distifler says the trade in spirits is quiet, and that prices are just about on a profitable basis. He says, however, that efforts are being made by outside parties to break prices.

Dcw, Jones & Co. say of Burlington: Buyers of Burlington have two reasons for theirfaith. The first is information from the management coming through various channels in regard to the outlook for the property. The second is the hope that the Supreme Court decision in the maximum rate case will be in favor of the Toads. There could be nothing more important for railway interests just now than a Supreme Court decision denying to some extent the right of railway commissioners to make arbitrary reduction in rates.

One of the stock market gossipers says that the principal reason which led the Southern Pacific to make the recent exchange of road with Atchison was the de-sire to benefit Pacific Mail. Pacific Mail York, and to have \$100,000 in London \$100,000 in San Francisco, and \$400,000 deposited to its own credit.

It owes nothing but current bills and financially occupies a position probably shared by no other stock selling at 27.

Kidder, Peabody & Co. will ship next Tuesday \$500,000 in gold to Germany.

There is a continued absence of inside support in Jersey Central. It seems prob able that the stock may be railed despite this by the manipulators, possibly even by the bears themselves. The bears believ Jersey Central is bound to go down, and it is plausible that nothing would suit them better than to see it go back to 75 temporarily, in order to put out new lines and

It is being claimed now for Chicago Gas that if the Dinois senate does not pass the gas bill the courts or a subsequent legislature will certainly permit consoli dation. The people who say this put out the suggestion that the stock will mean while reach a higher level on its earnings and a dividend sale. The present time, if not forever, the shrewdest traders in gas are telling me.

blom, the Chicago broker, has undoubtedly been of great benefit to him. Mr. Lindblam is recognized as one of the best authorities on the wheat market, in addition to being a most reliable and satis factory broker to do business with. today Yesterday's buils were confirmed in their faith, and Friday's bears were in a mood to be converted. French news had more to do with the change in temper than anything else. It was claimed that the official crop report would show a drop in area of 10 per cent and a less in condition of 20 per cent from last year. An influential exporting house had a estimating the French necessities up to harvest at 12,000,000 bushels and its requirements next season at 76,000,000 bushels. Less important news than this would have changed the temper because the sentiment last night was too bearist and the market oversold.

There was not much cash business sibly 65,000 bushels, and a share of this was to replace the sanken cargo of the Florida. New York had twenty-three loads. The expectation of a lot of built statistics Monday was not disturbed. Liv-erpool was strong at 1-4d, advance, ignoring the outbreak of yesterday. Argentine shipments were only 8,000 bushels and in seventeen weeks the South American republic has contributed 12,000,000 less than for the same period last rear. It is not to be supposed, however, that everything is bellish. There is perfect weather West. Receipts are pouring into the Northwest-ern markets; 654 cars today.
